Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Donovan et al. (2002/0010492).

Regarding claims 1, 6, and 11, Donovan et al. shows a method of increasing VEGF in a muscle cell and angiogenesis in a muscle tissue comprising the step of applying electrical voltage to the muscle cell or one or more areas of the muscle tissue, wherein the electrical voltage does not induce contraction of the muscle cells and wherein VEGF is increased and angiogenesis is induced after application of the electrical voltage ([0004], [0028],[0039], [0049], [0054-0055], [0083-0084]).

Referring specifically to claim 6, although Donovan et al. does not specifically point out the increase of VEGF mRNA but points out an increase VEGF expression (claims 32, 49, 52) the Hang et al. article *VEGF gene expression is upregulated in electrically stimulated rat skeletal muscle* used the terms VEGF expression and VEGF mRNA interchangeably.

With respect to claims 2, 7, and 12, Donovan et al. shows the voltage is 0.1V at 50Hz [0054-0055].

Art Unit: 3762

Regarding claims 3- 5, 8-10, and 13-15, Donovan et al. shows the muscle or muscle cells are smooth, skeletal or cardiac [0079].
